

Misys Loan IQ Managed Hosting

Delivering Misys Loan IQ with controlled costs and reduced operational risk

Misys Loan IQ™ Managed Hosting delivers the features and advantages of our market leading Misys Loan IQ solution in a cost-effective, secure delivery platform.

Solution overview

Misys Loan IQ's Managed Hosting Services provides your organisation with the entire technological infrastructure and personnel required to operate and maintain your Misys Loan IQ solution. Managed Hosting clients bypass in-house installation, and avoid significant hardware and database purchases, resulting in a quicker and more cost-effective implementation.

Misys manages all aspects of the hosted environment and reduces your exposure to multiple third party liabilities. In the hosted environment, clients can easily add new modules, APIs and users as well as receive system upgrades. Maximum security is ensured by segregating and securing each client's information within its own dedicated database.

Unrivalled industry experience

Misys has been delivering mission-critical, browser-based solutions since 1994 with more than 1 billion transactions processed per year. Our client base includes 850 customers worldwide, including banks, fund managers and corporations. We combine this extensive experience with our market leading Misys Loan IQ system to offer you a robust solution steeped in strict operational controls and security.

Maximum security and control

Each Misys Loan IQ Managed Hosting client has its own dedicated database in which all information is fully segregated and secured. To ensure the strictest level of control, Misys also has a 24 x 7 monitored data environment with a geographically separate disaster recovery facility.

Unlike other providers who outsource services to 3rd party vendors, Misys provides and manages all aspects of the hosted environment. This enables us to reduce costs and minimise your exposure to 3rd party liabilities while providing you with a single point of contact.

Benefits

- + Proven industry leading application with over 1 billion transactions processed per year
- + Complete turnkey service, including system installation and maintenance
- + Quicker, more cost-effective implementation
- + Reduced total cost of ownership, predictable costs and minimised operational risks
- + Maximum security and control of data with geographically separate disaster recovery facility

Faster, cost-effective implementation

Through using Managed Hosting services, your organisation will be able to implement your Misys Loan IQ solution quicker and more cost-effectively as compared to an in-house installation. It's the same industry leading Misys Loan IQ system, just delivered more quickly and with a lowered total cost of ownership.
