

Misys BankFusion

The Future of Banking

Misys has leveraged 30 years of knowledge as one of the world's leading financial software and services companies to develop BankFusion.

BankFusion is Misys' new platform that allows banks to deploy business applications with unprecedented speed and agility.

Through this unique game-changing solution, we now have the technology to allow our customers to realise significant competitive advantage.

Misys BankFusion provides banks the ability to bring new products to market in days not months, help you change your business process in minutes not weeks and react to the changing business environment in real time.

We believe this is the technology solution that banks need to help them deliver the business agility they've been looking for.

"Business process-enabled core systems unlock banks' potential to drive more aggressive and sustainable growth."

"BankFusion provides updates that are error free... a true cost of ownership advantage."

"Institutions are no longer constrained by arcane, restrictive, time-consuming and horribly complex practices... far greater degree of business control and ownership."

"... has significant potential as a truly modern banking system... more effective than existing monolithic banking systems."

"... highest score on depth of integration."

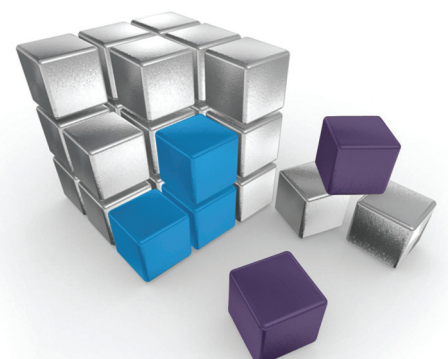

Business challenges

Agility – providing quick and accurate solutions for customers and partners, responding to market demands

Visibility – Clear compliance with changing regulatory demands

Efficiency – the pressure to deliver more with reduced administration and streamlined processes

“Flexibility was a key issue...the architecture and the flexibility of the system will allow us to move faster in order to comply with regulations...”

Alejandro Ramos, CTO, Actinver

Misys BankFusion - Providing innovation, flexibility and an architecture fit for tomorrow's requirements

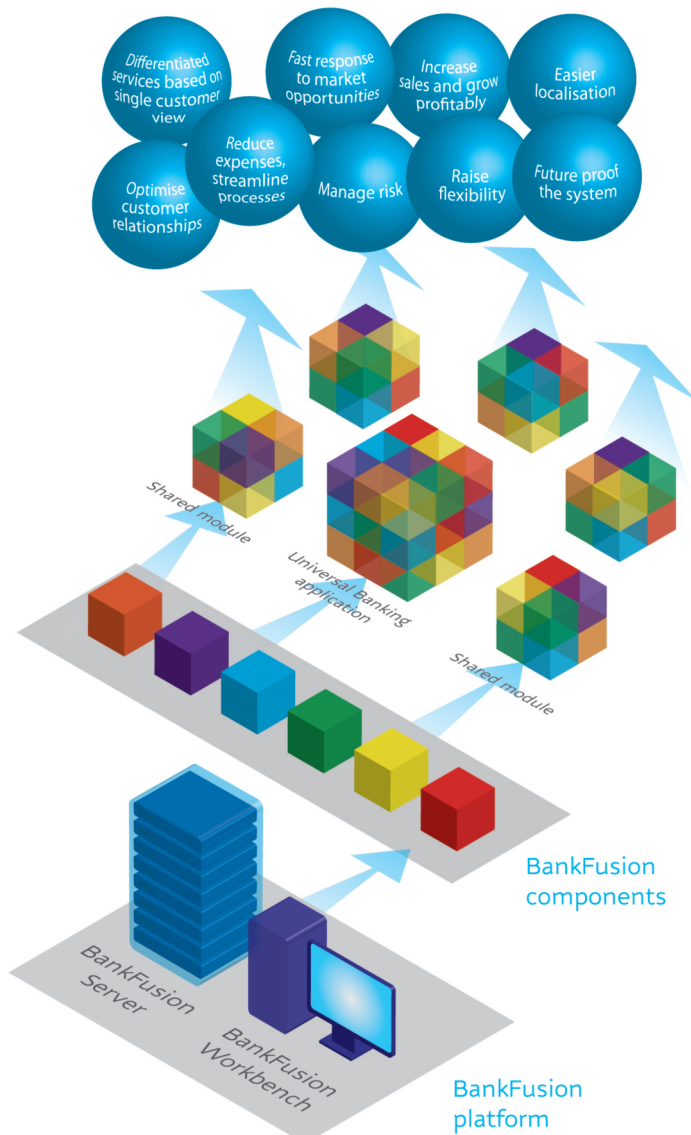

Unique attributes delivering real business value:

- + Fully **process-driven** core banking solution gives high flexibility
- + BankFusion Workbench **graphical design time** accelerates development at a lower cost
- + **Use of Components** makes adapting business process to desired workflow simple
- + BankFusion Server **automated code generation** saves time and expensive IT resources

BankFusion has been developed in response to the challenges being faced by today's financial institutions.

We recognise the need to give institutions a choice when it comes to the decisions around core systems change and deployment.

Through our BankFusion technology, we are providing banks with options to meet these demands.

Renovation

BankFusion gives you the opportunity to revolutionise your existing core system in a cost-efficient, low-risk and non-disruptive way.

Renewal

For those institutions considering legacy system replacement, we have used BankFusion to build a pure java-based Universal Banking solution giving you unparalleled flexibility and agility.
