

# Misys Learning Suite

**As your largest Misys solution audience, your end-users play a key role in increasing the value of your Misys solutions. With the right set of skills, you can give this group the confidence, knowledge and competency to achieve long-term success. As a result, you will see faster acceptance of the solution and new application-related processes, and you will be able to establish a higher level of capability and performance. Put simply, the more skilled your end-users, the more value you will get from your Misys solutions.**

The Misys Learning Suite is a software application that enables the production of a high quality, fully customisable, blended end-user learning programme comprising:

- + Highly Interactive e-learning Simulations;
- + Training Documentation:
  - + Comprehensive end-user training course guides;
  - + HTML web pages;
  - + Flash / Macromedia synopsis.
- + On-line training evaluation to track users' progress.

The Misys Learning Suite is fully compliant with industry standards and supports AICC and SCORM. This enables e-learning simulations and tutorials to be easily uploaded into your Learning Management System, or published via the Misys Learning Suite Portal.

#### Key Features of the Misys Learning Suite:

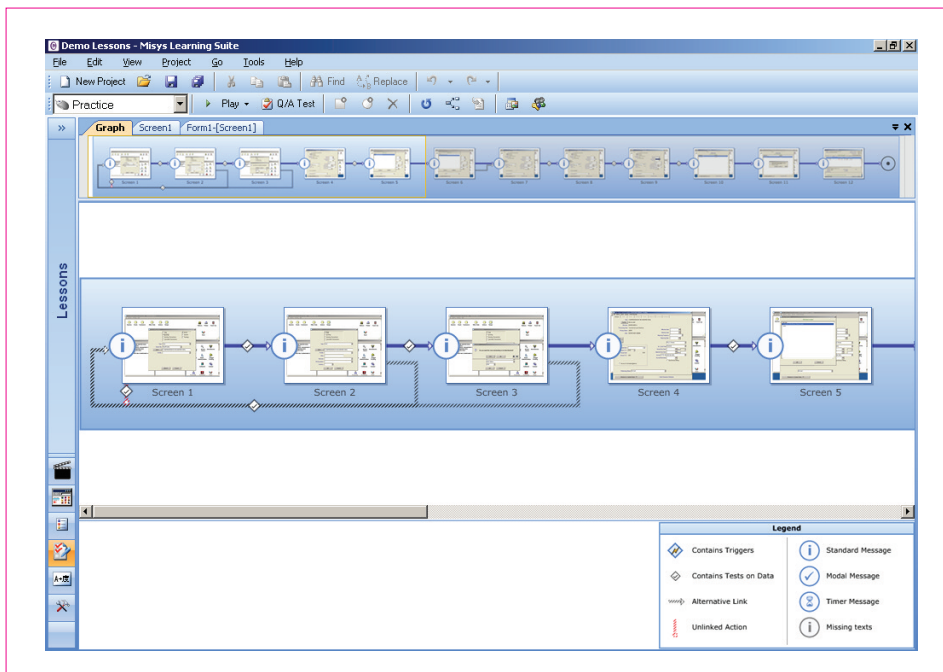

- True View** - cloning technology replicates your Misys solution, making it easier for users to learn on their own business processes
- Create Multiple Learning Modes from a single Source** - ability to publish e-learning, tutorials and training guides
- Role-Based Content** - users only learn what they need to do in their job role
- Assessments** - Track users' progress with results of user interactions. Scores can be uploaded to a Learning Management System
- Object Recognition** - simulations capture objects enabling full ANSI and Unicode formats
- Multilingual capability** - capture your simulations and tutorials once, and translate into local language - all with only having to maintain one version
- Maintainability** - cost-effective maintenance of simulations - only modify what's needed in the simulation and republish all tutorials and documentation to incorporate modifications
- On-going support after Go Live** - simulations available to support new hires, internal job changes and just in time learning for all users

“

Untrained users require three to six times more support than trained users

– Meta Group

”

### Benefits of e-learning

- + Learning can take place 24/7 to suit the user
- + Users can learn at their own pace
- + Just in time learning – learn when you need it
- + Geographical Barriers are eliminated – users can learn remotely from anywhere
- + Travel and associated costs are greatly reduced

### Misys Learning Suite Consultancy Services

**Strategy and Planning Workshops** - to help you lay the high-level foundation for your Misys Learning Suite Programme

**Training** - Courses to provide you with the skills necessary to build high quality learning programmes

**Content Development Services** - Where you need support to develop content, Misys can provide dedicated education consultants to support your course development

**Train the Trainer** - We will equip your trainers with the necessary skills to be able to deliver the Misys Learning Suite “blended” solution

**Course Delivery** - Misys Education Consultants can help you deliver programmes that meet the needs of your audience
