

Misys **Connect**
Pilot & Deploy

Programme overview

Engineering Collaboration

Misys is keen to work with customers who are pushing the boundaries. The Misys Engineering Collaboration programme helps to ensure our software meets your business and technical requirements, from early adopter support to ongoing upgrades and new product releases.

The Misys Engineering Collaboration programme is designed to bring you closer to our Development and QA functions to help you benefit from new software releases as soon as possible and to help you provide your input to those releases.

The Misys Engineering Collaboration programme makes early adoption of newly released software a safe, viable business proposition. Misys commits additional support from its software development team to help resolve issues quickly and ensure faster deployment timescales.

The programme enables customers to contribute test scenarios and use cases to minimise unexpected issues. This process of sharing test cases is particularly effective for customers taking advantage of the Misys Upgrade Factory to facilitate upgrades to the latest releases of our software.

Misys follows Agile development practices. The short, time-boxed Agile 'sprints' that create tested, end-to-end components allow completed software components to be made available more quickly, providing an early view of new application functionality.

Sharing new functionality in this way removes ambiguity and helps to clarify requirements and expectations early on. Your early stage feedback provides precious insight that helps Misys to align our software more closely with your business requirements.

Misys **Connect**
Pilot & Deploy

Help Misys align software to your business requirements

The Engineering Collaboration programme welcomes customers who would like to work together on the development of new capabilities and products. Working with you interactively during the development process increases the depth of partnership and helps Misys to steer the long-term development of both new and existing products.

To find out more about this and further Misys Connect programmes, speak with your account manager, or for a response within 24 business hours, e-mail misysconnect@misys.com.

About Misys

Misys is at the forefront of the financial software industry, providing the broadest portfolio of banking, capital markets, investment management and risk solutions available on the market. With more than 2,000 customers in 130 countries our team of domain experts, combined with our partner eco-system, have an unparalleled ability to address industry requirements at both a global and local level. We connect systems, collect data and create intelligent information to drive smarter business decisions. To learn more about how our Fusion software portfolio can deliver a holistic view of your operations, and help you to solve your most complex challenges, please visit misys.com and follow us [@MisysFS](https://twitter.com/MisysFS) on Twitter.

Misys and the Misys 'globe' mark are trade marks of the Misys group companies.
