Programme overview

Misys University

Misys University offers customers and partners a wide range of education and training programmes to help you maximise the benefits of our software.

With the right set of skills, administrators, developers and end-users gain the knowledge, competency and confidence to achieve long term success. As a direct result, you will recognise a faster acceptance of the solution and new software-related business processes.

According to research, user adoption is the biggest roadblock to achieving the business benefits of any new IT system. Managing your environments properly depends on proper training.

IDC estimates that, "A company will lose 10 to 30% of its capabilities per year. By year three, an organization has retained only 41% of its original capabilities, dwindling to 24% by year six, due mostly to employee movement, process changes, technology changes and the dearth of knowledge new hires bring to the organisation."

Misys University offers a wide selection of standardised and customised courses to help train your teams in the most effective operation and use of your software.

All courses are offered utilising a variety of training methods, including e-Learning and the Misys Training Labs (MTL), a unique virtual hands-on training system. MTL allows expert trainers from Misys to combine superior interactivity with each student, working hands-on using a live training system, with the convenience and cost benefits of computer-based study.

Take advantage of in-depth training from Misys experts

Misys also offers in-person training, either at your location or a Misys Training Centre:

- › Courses are divided into core solution families: FusionBanking, FusionCapital, FusionInvest and FusionRisk, with specific training for each product line. Similarly, there are multiple course types, such as developer, technical, analyst and user, offered at suitable levels, including introduction, advanced and deep-dive.
- › For our partners we offer training courses including a certification exam. Passing this exam will result in a certificate to confirm that the participant is a Misys Certified Consultant.

- › Choose the courses that most closely match your needs, from technical deep-dives to business-level overviews. The standard courses are open to all Misys customers on a shared basis, or you may prefer to train your team with exclusive sessions for your organisation.

Discover the huge range of options available through Misys University and fully exploit the power and capabilities of your software.

To find out more about this and further Misys Connect programmes, speak with your account manager, or for a response within 24 business hours, e-mail misysconnect@misys.com.
